

Wieslab Bioanalytical Services

Your dedicated bioanalytical partner

Wieslab Bioanalytical Services offers support through a range of services and expertise to Pharma, Biotech and CRO companies. Our focus is on large molecules within non-clinical as well as clinical phase I - III clinical studies. We offer ISO 17025, GCP and GLP compliant services ensuring that regulatory requirements are met.

At our Sweden-based laboratory, we combine in depth knowledge from +25 years of clinical diagnostic testing, novel technologies and scientific expertise in immunological interactions, with more than 10 years experience in bioanalytical CRO services. We develop and validate assays for sensitive testing and analysis of biological drugs, biomarkers and anti-drug antibodies (ADA).

Bioanalytical Services highlights

- Scientists and project managers with experience in development and validation of assays according to relevant guidelines
- Key areas of expertise:
 - Bioanalysis: Biotherapeutics and biosimilars for toxico- and pharmacokinetic evaluations
 - Bioanalysis: Biomarkers
 - Immunogenicity: ADA – screening and confirmatory assays as well as neutralization assays (NAb)
 - Consultant services to optimize your study and submission success
 - CMC support for development of potency assays for non-GMP drug lot release
- Custom-made *iLite*[®] cell line services
- Bioanalytical laboratory services according to ISO 17025, GCP and GLP

At Wieslab Bioanalytical Services we use kits, applications and the innovative *iLite*[®] assay ready cell technology from our parent company Euro Diagnostica. We take pride in meeting our clients' needs, and use your preferred suppliers when requested.

Our knowledge base within clinical diagnostics, immunoassay development and bioanalytical GLP compliant laboratory services, gives you an expert partner with a comprehensive understanding of your project and the knowledge to help accelerate your drug development project.

Technologies

- Reporter gene cell-based assays
- Enzyme-linked Immunosorbent Assays (ELISA) in various formats
- Meso Scale Discovery (MSD) Electrochemiluminescence (ECL)
- Radioimmunoassays (RIA)
